PROFESSIONAL SUMMARY

Enthusiastic Artificial Intelligence student with strong skills in Python, Java, SQL, Machine learning, and Web development. Driven by curiosity to create smart, efficient, and user-friendly solutions. Always eager to learn, adapt, and turn ideas into impactful innovations through teamwork and creativity.

EXPERIENCE

Machine Learning Intern   06/2024 – 08/2024 | Remote
Inspire Softech solution 🔗
- Python OOPS required for Machine Learning.
- Machine Learning concepts from Basic Classification, Regression.
- Gained hands-on experience with NumPy and Pandas for data manipulation and analysis.
- Learned data visualization using Matplotlib and explored basics of the Scikit-learn library.

Full Stack Development Intern   06/2025 – 08/2025 | Remote
InfiTech Learn 🔗
- Developed and deployed full-stack web applications using HTML, CSS, JavaScript, Node.js, Express.js, and MongoDB.
- Gained hands-on experience by developing real time Projects in Full Stack.

EDUCATION

Bachelor of Engineering (Computer Science-Artificial Intelligence)   08/2022 – Present | Madanapalle
Madanapalle Institute of Technology and Science
CGPA 7.8/10

Intermediate (MPC)   2020 – 2022 | Vijayawada
Narayana Junior College
Percentage - 79.%

Class 10th - CBSE   2019 – 2020 | Kurnool
Montessori Indus EM High school
CGPA 6.88/10

SKILLS

Languages — Java, Python, SQL, HTML, CSS, Machine Learning • **Libraries** — NumPy, Pandas, Matplotlib • **Tools** — VS Code, Google Colab, Git & GitHub, MongoDB, MySQL

PROJECTS

Machine Learning Classification Model(Spam Mail Prediction)
- Built a text classification model to detect spam messages using the Multinomial Naive Bayes algorithm.
- Implemented data cleaning, tokenization, and feature extraction techniques to improve accuracy and ensure reliable predictions.

Web Portfolio
- Designed and developed a responsive personal portfolio website using HTML and CSS. Showcases academic projects, skills, and contact information in a clean, user-friendly layout.
- Focused on accessibility, responsive design, and modern visual.

InTouch Portal
- Built a fully functional contact form using HTML and CSS on the frontend, with Node.js and Express handling backend logic. User input is securely sent to the server and stored.
- Implemented environment variables for secure and scalable deployment.

CERTIFICATIONS

- Full Stack Web Development - Geeks for Geeks 🔗
- Python Programming - SIDH 🔗
- Micro-Certification - Agentic AI Executive - ServiceNow 🔗
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate 🔗
- SQL and Relational Databases 101 - IBM 🔗
